Technical

Q #1 Numerical Type Award: 1 Penalty: 0 Discrete Mathematics

How many committees of 5 students can be selected from a class of 25?

Your Answer: Correct Answer: 53130 Not Attempted Time taken: 00min 00sec Discuss

Q #2 Numerical Type Award: 1 Penalty: 0 Discrete Mathematics

A Club consists of 20 members, of which 9 are male and 11 are female. Seven members will be selected to form an event-planning committee. How many committees of 4 females and 3 males can be formed?

Your Answer: Correct Answer: 27720 Not Attempted Time taken: 00min 00sec Discuss

Q #3 Numerical Type Award: 1 Penalty: 0 Discrete Mathematics

How many 7-digit telephone numbers can be formed if the first digit cannot be 0 or 1 ?

Your Answer: Correct Answer: 8000000 Not Attempted Time taken: 00min 00sec Discuss

Q #4 Numerical Type Award: 1 Penalty: 0 Discrete Mathematics

In a race with 15 runners where 6 trophies will be given to the top 6 runners (the trophies are distinct: first place, second place, etc), how many ways can this be done?

Your Answer: Correct Answer: 3603600 Not Attempted Time taken: 00min 00sec Discuss

Q #5 Numerical Type Award: 1 Penalty: 0 Discrete Mathematics

8 students on a student council are assigned 8 seats around a U-shaped table. How many ways can a president and a vice-president be elected from the 8 students?

Your Answer: Correct Answer: 56 Not Attempted Time taken: 00min 00sec Discuss

Q #6 Numerical Type Award: 2 Penalty: 0 Discrete Mathematics

Three hardcover books and 5 paperbacks are placed on a shelf. How many ways can the books be arranged if all the hardcover books must be together and all the paperbacks must be together?

Your Answer: Correct Answer: 1440 Not Attempted Time taken: 00min 00sec Discuss

Q #7 Numerical Type Award: 2 Penalty: 0 Mathematical Logic

How many ways can you pair up 8 boys and 8 girls? (i.e. How many pairs having one girl & one boy are possible?)

Your Answer: Correct Answer: 64 Not Attempted Time taken: 00min 00sec Discuss

Q #8 Numerical Type Award: 2 Penalty: 0 Discrete Mathematics

How many ways can you arrange 9 people into 3 rows of 3 desks each?

Your Answer: | Correct Answer: 362880 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #9 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

Out of 2 Women and 5 Men, a committee of 3 is to be formed. In how many ways can it be formed if at least one woman is to be included?

Your Answer: | Correct Answer: 25 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #10 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

In how many ways can a cricket eleven be chosen out of a batch of 15 players if a particular player is always chosen?

Your Answer: | Correct Answer: 1001 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #11 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

In how many ways can a cricket eleven be chosen out of a batch of 15 players if a particular player is never chosen?

Your Answer: | Correct Answer: 364 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #12 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

In a race with 15 runners where 6 trophies will be given to the top 6 runners (the trophies are distinct: first place, second place, etc), how many ways can this be done, if a certain person, Ram, must be one of the top 3 winners?

Your Answer: | Correct Answer: 720720 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #13 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

How many ways can you choose 4 groups of 4 people from 16 people, assuming the groups are distinct (i.e. group A, group B, group C, group D)?

Your Answer: | Correct Answer: 63063000 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #14 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

Suppose we have 4 Americans and 6 Canadians. How many ways can we arrange them in a line if all the Americans have to stand together?

Your Answer: | Correct Answer: 120960 | Not Attempted | Time taken: 00min 00sec | Discuss

Q #15 | Numerical Type | Award: 2 | Penalty: 0 | Discrete Mathematics

Suppose we have 4 Americans and 6 Canadians. How many ways can we arrange them in a line if not all the Americans are together ?

Your Answer: | Correct Answer: 3507840 | Not Attempted | Time taken: 00min 02sec | Discuss
